

# PICK DICE

*A Smart Grocery Recommendation App*

SMARTER CHOICES,  
TASTIER DISCOVERIES

# 5 WHY

**1** Why do I always drink Aloe juice?

Because I think Aloe juice tasting good than water.

**2** Why Aloe juice tasting good?

Because Aloe juice not too sweet.

**3** Why don't you try the other juice which not sweet?

Because I don't know which juice is not sweet.

**4** Why don't you want to explore other juices?

Because I don't want to waste money on something I might not like.

• **5** Why are you afraid of wasting money on new juice?

Because I feel safer sticking with something I already know I enjoy..

•

Name: Naomi

Age: 23

Occupation: Student

Consumption Habits: Repeated consumption  
(Not noly for drinking)

Repeated/Healthy/  
Delicious/Reassuring/  
Good-looking

Underlying Reasons: Have a sense of security for familiar drinks and food, and don't want to waste silent cost trial and error taste/use feeling. → TIME CONTRAL

Something unique: Afraid of trial and error, but like to try new things. Easy to cause anxiety.

Dreading to change: Maintain the purchase of raw materials for food (enthusiasm for cooking)

Excited to change: Reduce dependence on the same kind of goods

# HMW

## How Might We Questions

HMW reduce the purchase of the same items?

HMW not hesitate when making new attempts?

HMW provide the motivation to make new choices ?

HMW reduce the time cost of wrong selection?

HMW feeling everything in control after making choice?

**Reduce repetition sustainable things and boost motivation and confidence when making new choices.**

### Amp up the good

HMW turn the act of making choices into a fun experience?

### Remove the bad

HMW minimize regret after making a new choice?

### Explore the opposite

HMW make uncertainty a key part of discovery?

### Question an assumption

HMW eliminate the need for users to compare before deciding?

### ID unexpected resources

HMW crowdsource recommendations from people with similar interests?

### Create an analogy from need or context

HMW turn picking something new into a social adventure?

### Play POV against the challenge

HMW make people excited about making decisions rather than anxious?

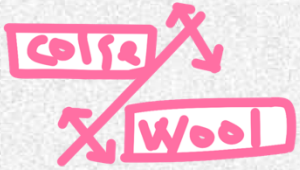

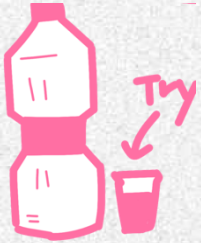

### Break POV into pieces

HMW change I buy the same unsustainable food and drink in supermarket?

How Might We  
+ Verb. (help/change/create.....) new behaviours /  
to change the user's consumption habits  
+ so that the user still meet their needs/using scenarios?

# Preliminary Idea

PICK DICE

HMW create my choices into a fun experience in supermarket?

## HMW change I buy the same unsustainable food and drink in supermarket?

Buy with friends

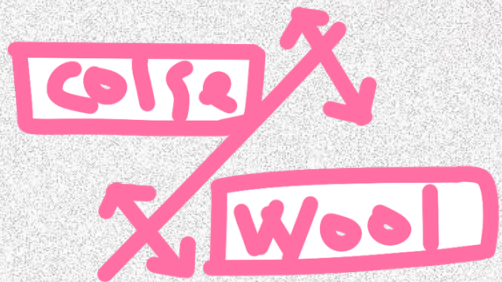

Try supermarket samples to make new choices.

Get advice from friends

Get advice from various software on the mobile phone

Go to different supermarkets

Tell chatgtp about your habits and ask him to list relevant plans.

Let others make choices for you

similar products to try

## HMW create my choices into a fun experience in supermarket?

**Give anxiety to supermarket employees and ask them to recommend the best-selling products.**

**The right to exchange choices with friends**

**Buy discount products to reduce sinking costs**

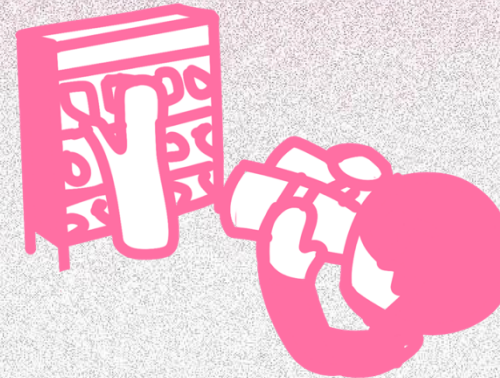

**Make a list of food/drinks every week, cross out what you buy, and don't buy it this week.**

**Reward yourself when making a choice (such as eating a dessert)**

**TPay attention to supermarket points and activities**

**Observe the people next to the shelf what they buy**

**Throw the dice to decide**

Throw the dice to decide

## ***Pain Points***

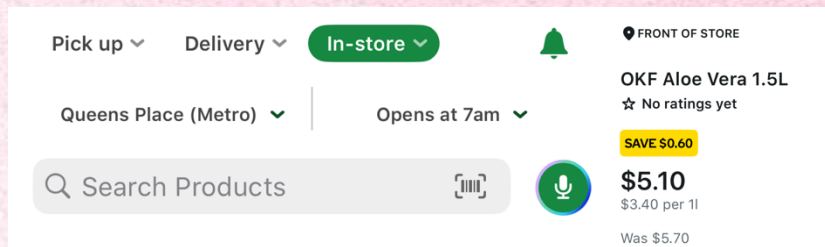

Get advice from various software on the mobile phone

The right to exchange choices with friends

- 1** Overwhelming and Scattered Recommendations
- 2** Wasting Time in Front of Store Shelves
- 3** Know it's an unsustainable product, but still buy it repeatedly.
- 4** Emotional Disappointment from Bad Purchases
- 5** Lack of Social Feedback or Trustworthy Reviews at the Point of Purchase
- 6** Low Motivation to Try New Products Without Incentives

The app connects with supermarkets to detect your location and identify nearby shelves and their contents

When you stay too long in front of a shelf, you'll hear a dice rolling sound and see a pop-up asking if you need help.

Throw the dice to decide

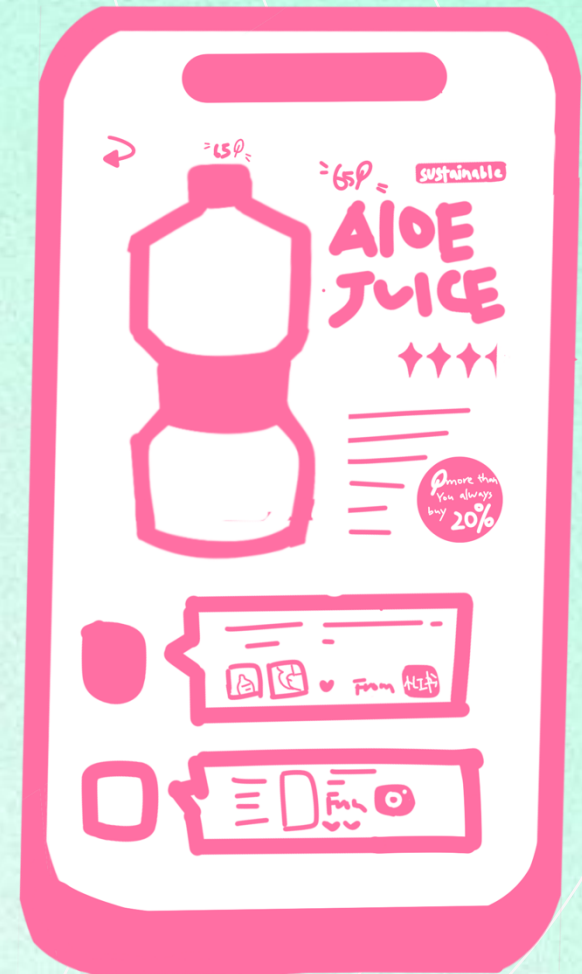

# ***SUSTAINABLE***

You can see the percentage of newly recommended items that are more sustainable than your previous total purchases in the new for you window.

In the detailed interface of the product, you can see the sustainable values more clearly.

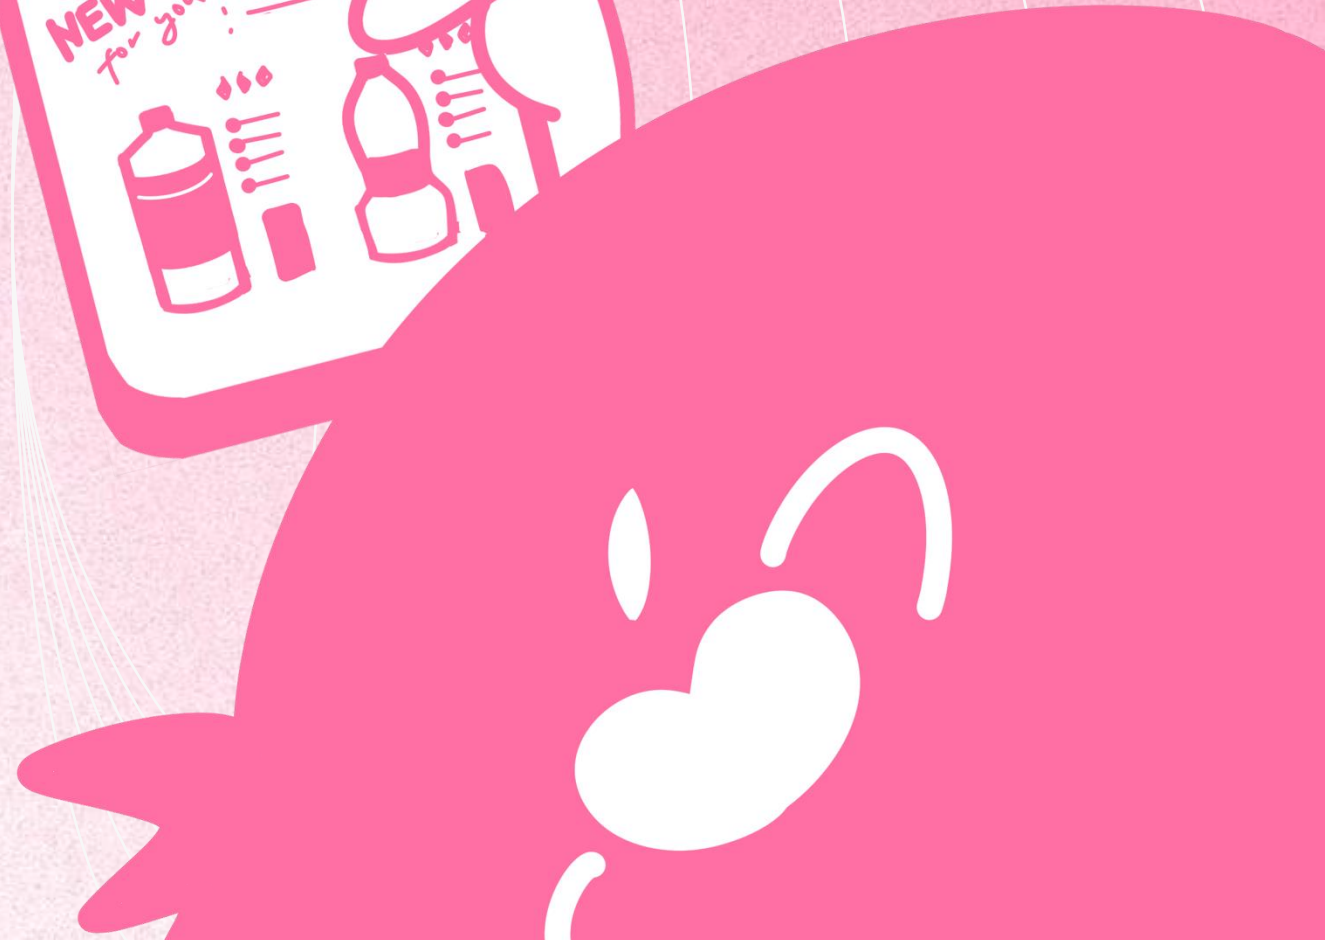

The app uses your past purchase history to recommend products you often buy — and makes sure they're available right next to you.

The recommended products are not only based on taste, but also sorted by the degree of environmental protection of packaging.

Get advice from various software on the mobile phone

The app gathers reviews of products you're interested in from major social platforms, and also features a dedicated community for shared user experiences.

In this interface, you can see the environmental protection level of the packaging of this product, such as whether it can be degraded, etc.

Get advice from various software on the mobile phone

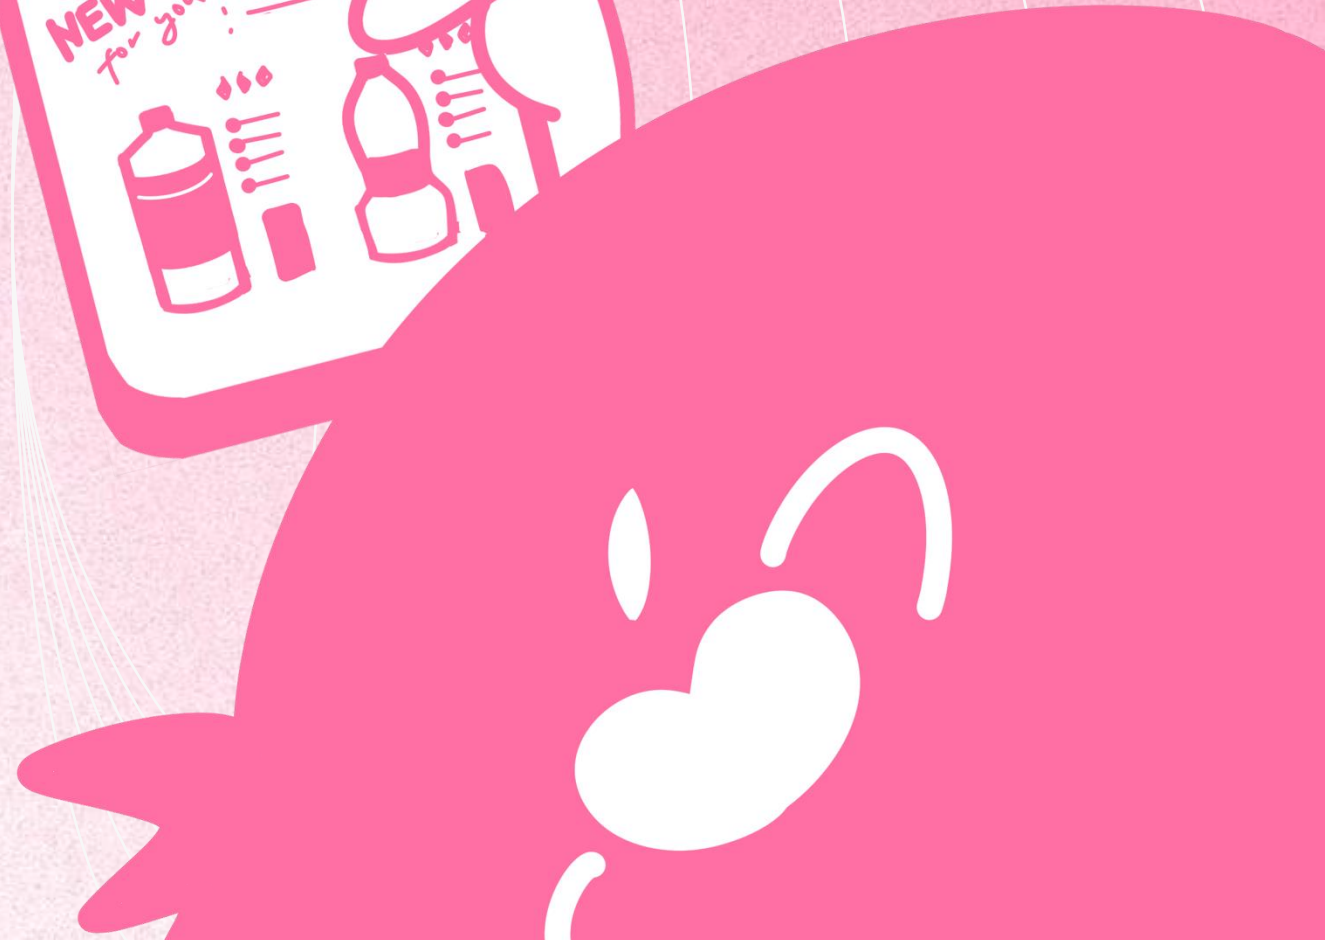

If you really can't choose, you can use the dice function to leave the choice to fate..

The results of the dice will give priority to products with high environmental value.

Throw the dice to decide

When you choose a new product and check out, the app adds Try Points to your account. You can use these points for discounts on future new items

When you choose to pack more environmentally friendly items, you will get more trypoints.

You can also earn Try Points by sharing your honest experience in the community after trying a new product. This helps grow the community and enrich the shared data.

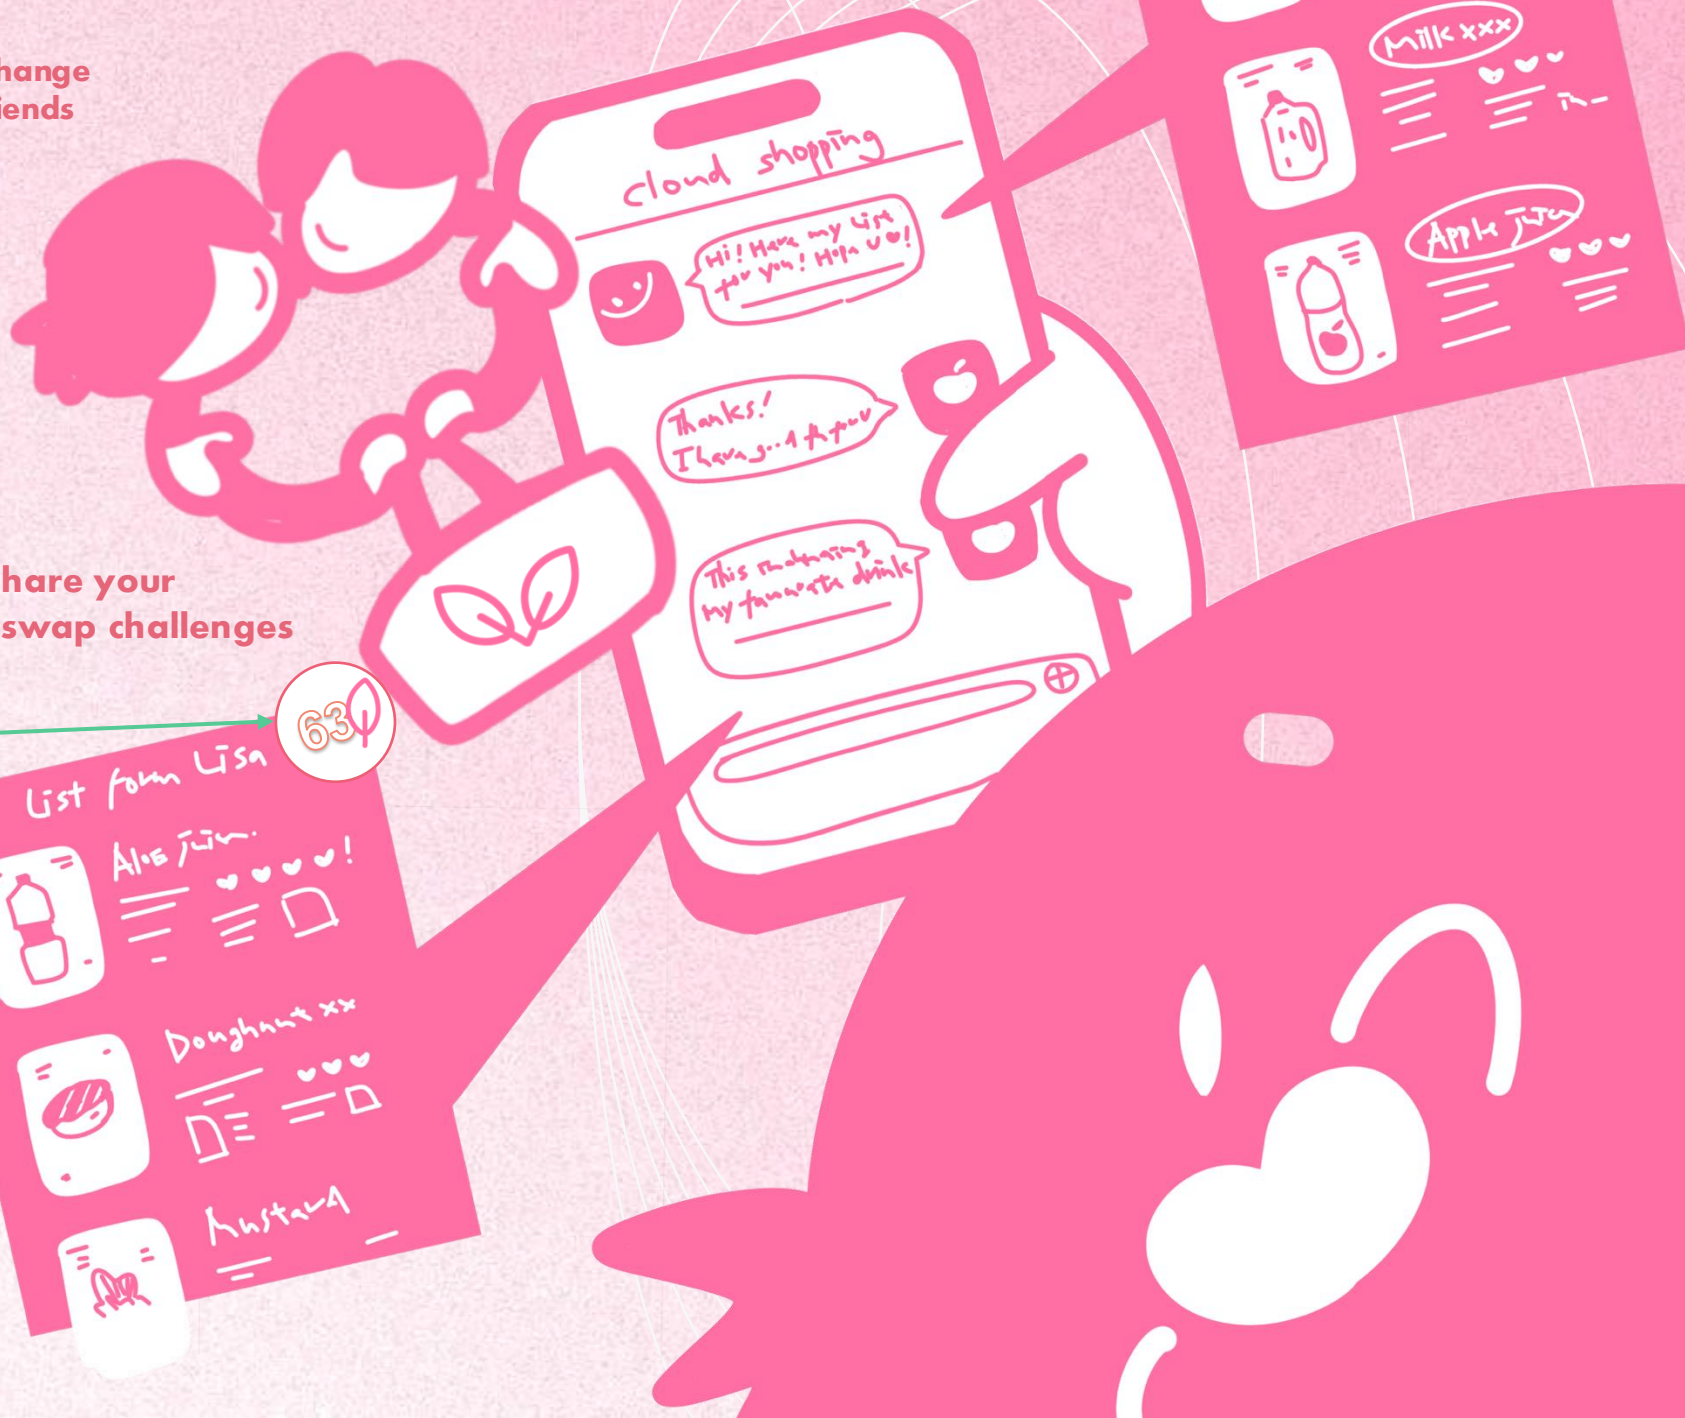

The right to exchange choices with friends

Shop virtually with your friends! Share your grocery lists and complete fun list-swap challenges together.

In the app, everyone's list will have a total environmental value, and the higher the level, the more challenge rewards will be.
